Our phone +49 (0)7152-12-213  
Our fax +49 (0)7152-12-9213**Ceasing of production of Lenze series 8200 and 9300**

Ladies and Gentlemen,

Our aim as producer of lines is to offer you the best possible service. To our opinion this includes the task to inform you about new products or spare part that are phased out and will be no more available.

In the past many of our lines were equipped with parts of the LENZE product series 8200 and 9300, according to our files your line also. We have been informed by Messrs. LENZE now that production of these series will be stopped.

- This refers to the LENZE frequency and servo inverters mentioned in the enclosure as well as accessories of the series 8200 and 9300.
- It will be possible to place orders with us for the parts listed until April 30th, 2019 or, even longer if they will be in stock.
- Due to the decreasing quantities of production as well as shortage of installed components, production costs of the unit series 8200 and 9300 will increase significantly. Depending on the part specification, price increases of 5% or even more will have to be expected for these parts as from May 1st, 2017 on. Delivery of parts until May 1st, 2017 will be made at the old price.
- Repairing of these parts, provided that repair will be possible, will be ensured until mid-2021

In order to offer you the best possible service we are going to stock many of the parts concerned at our works. Nevertheless, we would strongly recommend our customers to store parts themselves or, on a medium-term basis to contact our experts in the Conversion Dept. regarding information on replacement and modernization solutions.

Please contact us, we would be glad to assist you in all matters

Best regards  
BRÜCKNER AFTER SALES GMBH & CO. KG
